BILLMADE POS FOR
ORACLE NETSUITE

Designed And Developed By Saturo Tech

BILLMADE POS

Billmade is solely developed using latest technology to ease the billing transactions with the features of purchase and sales and it easily integrates with NetSuite and other ERP's.

Billmade can be used for several business sectors such as retail, hotels and restaurants, medical & hospitals and many more.

Billmade can also be integrated with any ERP on real time basis.

Billmade can be used as an independent platform for point of sale & purchase transaction.

Billmade allows retailers to manage inventory, customers, vendors, store's analytics and process transactions.

Billmade can be configured for promotional codes.

Billmade includes the functionality for the user to use promotions or coupons for better enhancement of sale.

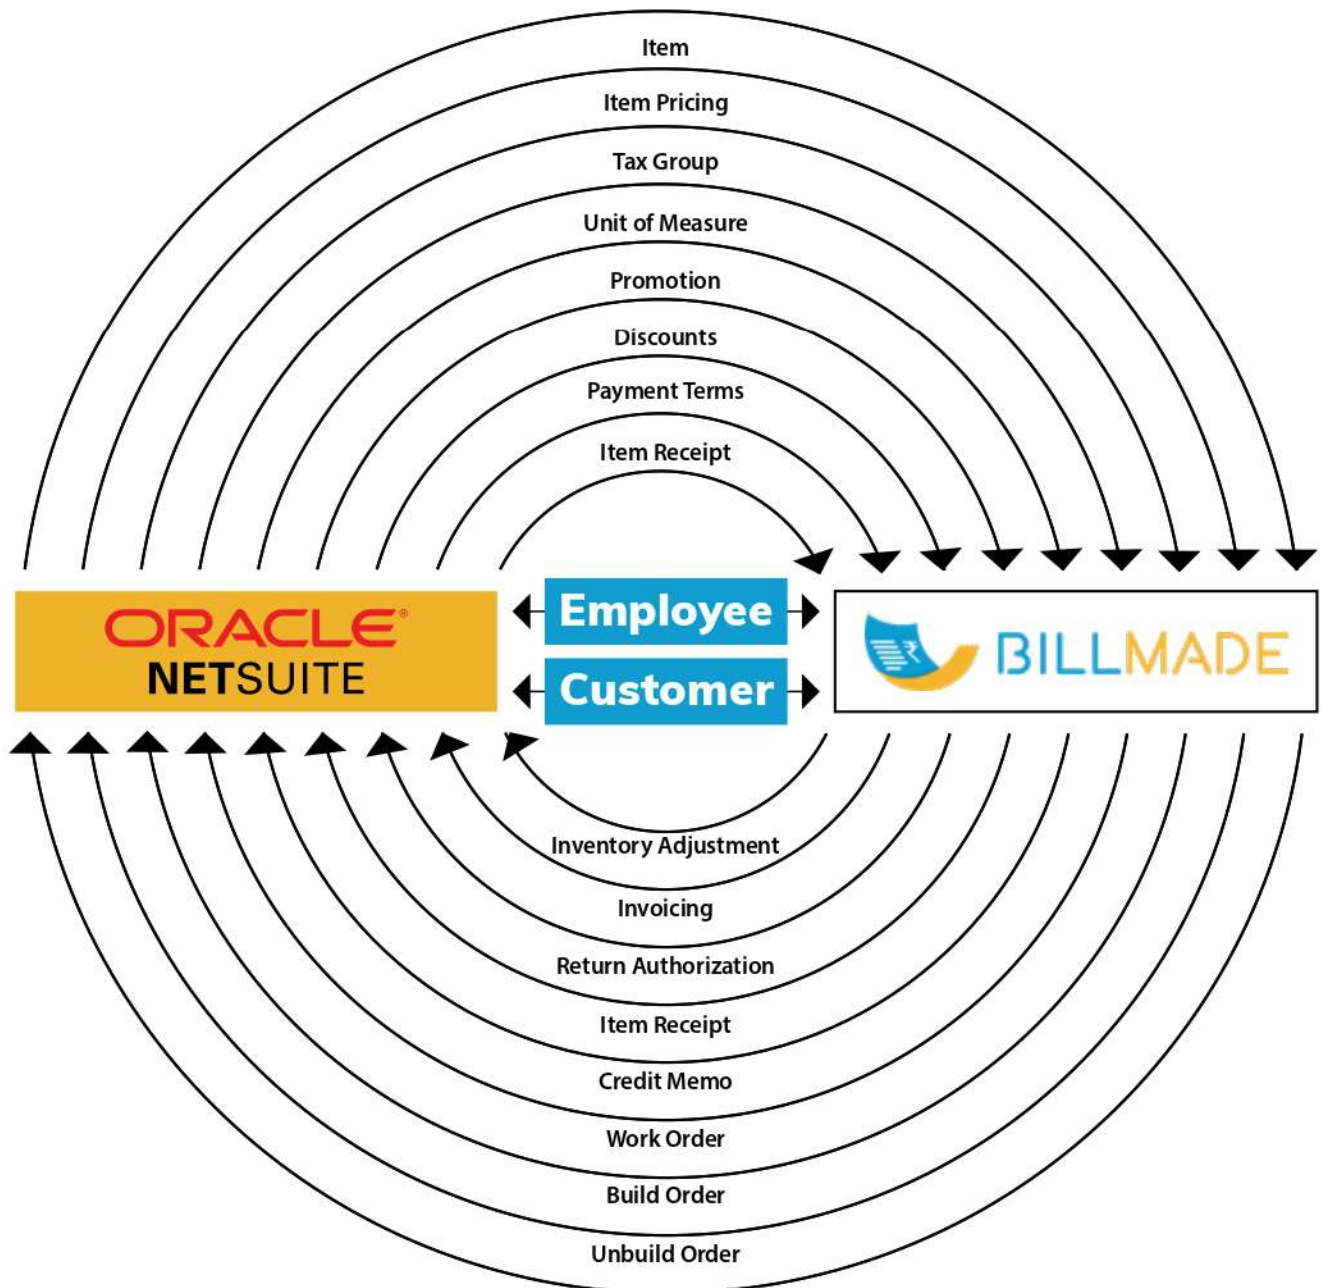

A correct integration makes your operations more efficient by automating the order transactions between your POS and NetSuite ERP. Since we are also NetSuite partner and having NetSuite expertise too, we have taken all kinds of measures to design this integration architecture.

Manually entering data from your POS into your NetSuite ERP is time-consuming and prone to mistake. With Billmade POS and NetSuite integration, you don't have to worry about inaccurate invoice, employee, customer and item data wreaking havoc on your operation and performance.

FEATURES

It provides prebuilt integration flows to synchronize customers, items, orders, promotion, discount, unit of measurement and billing between NetSuite and Billmade POS, eliminating multiple data entry and maintenance between the systems.

ADVANTAGES OF USING NETSUITE ERP AND BILLMADE POS TOGETHER

※ Quick implementation.

※ Real time data transfer between stores/location to NetSuite ERP.

※ Real time visibility for daily sales by stores/location.

※ Real time inventory visibility across stores/location.

※ Quickly expand your store/location network without worrying about IT solution for billing and stock management.

※ Billmade POS enables you for offline billing even if internet goes down. It syncs/ synchronizes data with NetSuite as soon as internet gets up.

OUR SERVICES

The prebuilt BILLMADE POS includes flows based on best practices and is easy to customize based on your requirement.

Saturo provides end to end solutions, which help both client and management, to associate with development team so that there can be transparency in development.

We can implement a flexible and scalable NetSuite integration for your business that will not only consolidate business processes and streamline transactions, but will also simplify your supply chain and decision making.
